CONSIDERATION OF SENATE RESOLUTION NO. 177

Senate Resolution No. 177

WHEREAS, By the enactment of the Penal Code and of the Public Utilities Code, as Chapters 363 and 364, respectively, of the Statutes of 1951, the Legislature has enacted the last two codes added for by the California Code Commission's long recommended plan of organizing the statutes of the State into 24 codes; and

WHEREAS, It appears from the 1950 Report of the California Code Commission, heretofore filed with each of the Members of the Legislature, that the commission anticipates bringing its work of codifying the laws of the State to substantially completion by the time the 1951 General Session of the Legislature convenes; and

WHEREAS, The commission has recommended that the problem of "bringing the codes in shape" and the problem of carrying forward a program for continuous revision of the statute law, both in matters of form and substance, become the subject of careful study during the interim between the 1951 and 1952 General Sessions of the Legislature, now, therefore, be it

Resolved by the Senate of the State of California, That the Senate Interim Committee on Judiciary is authorized and directed to ascertain, study, and compile all facts relating to the subject matter of the contents of this resolution, and particularly to the desirability of effecting the California Code Commission's long recommended plan of organizing the statutes of the State into 24 codes, and of the desirability of undertaking a continuing program of revising the statute law, including but not limited to a study of the experience of other states (such as the State of New York which has carried on such work over a period of years) and of the desirability of providing representation by Members of the Legislature in any such agency, and to report thereon to the Senate, including in the reports its recommendations for appropriate legislation.

Resolution read, and on motion of Senator Regan, adopted and re-referred to Interim Committee on Judiciary.

RESOLUTIONS

The following resolution was offered:

By Senator Collier:

Senate Resolution No. 220

Relative to requesting the California Code Commission to study and report on the feasibility of repealing certain unused district laws

WHEREAS, There are in force but not in use a number of laws for the organization and operation of various types of public districts, and it appears unlikely that districts will ever be organized or operate thereunder; and

WHEREAS, It is desirable that such laws be repealed, since they serve no useful purpose and merely increase the size and cost of compilations of the laws of this State; and

WHEREAS, Bills were introduced at this session for the repeal of some of these laws, which were not enacted because of the lack of information as to the effect of such repeals; and

WHEREAS, The California Code Commission is presently authorized to report to the Legislature such substantive changes in the law as it deems proper, and a study and report by that agency would be helpful to the Legislature in considering this problem; now, therefore, be it

Resolved by the Senate of the State of California, That the California Code Commission is hereby requested to make such study as may be feasible of the subject matter of this resolution and matters pertinent thereto and to report thereon to the Legislature at the 1953 Regular Session, including in such report its recommendations as to which district laws may be repealed without material detriment to the public welfare and such other information and recommendations as it deems may be useful to the Legislature.

Senate Resolution No. 216

Has had the same under consideration, and reports the same back with the recommendation: Be adopted.

Committee membership 5; committee vote: Ayes 5.

POWERS, Chairman

Request for Unanimous Consent

Senator Breed asked for, and was granted, unanimous consent to take up Senate Resolution No. 216, at this time, for consideration.

CONSIDERATION OF SENATE RESOLUTION NO. 216**Senate Resolution No. 216**

Relative to directing the interim Senate Committee on State and Local Taxation to study and report on the problem of sales and use taxation

WHEREAS, In the past four years numerous cities in the State of California have adopted sales and use taxes until there are now over 135 cities using this method for the raising of revenue; and

WHEREAS, There is no uniformity among the various ordinances under which these taxes are levied nor in the rates, methods of collection or the impact of the taxes; and

WHEREAS, The presence of state and numerous local sales or use taxes and their nonuniformity require retailers in California to file a multitude of reports and submit to many separate audits, thereby placing a costly and unnecessary burden upon retailers and ultimately upon the consumers; and

WHEREAS, It is the purpose of this Senate, as shown in the 1947 and 1949 reports of the interim Senate Committee on State and Local Taxation, to encourage the elimination of duplication of governmental activities and to reduce both the direct and indirect cost of state and local government and to encourage among other things the stabilization and equalization of sales and use taxes; and

WHEREAS, It is the belief of this Senate that the best interests of state and local government and the people of this State will be served if sales and use taxes are stabilized and equalized by a uniform system of sales and use taxation for both state and local levies and a single system for collection and reporting by the retailer; now, therefore, be it

Resolved by the Senate of the State of California, That the interim Senate Committee on State and Local Taxation, or such other Senate interim committee with similar powers, and duties as may be deemed necessary, be requested to take such steps as are necessary to complete the study of the problem of local sales and use taxation, and to consider the various types of appropriate legislation necessary to set up a system under which the State of California will act as the collecting agent for all sales and use taxes, state and local, and requiring that all sales and use taxes be levied under a uniform law and at a single rate (1% or 1 1/2% each (1)), and providing for the remittance by the State of a specified portion of such sales and use tax collections to the local political subdivisions of the State; and be it further

Resolved That said committee is requested to make its report on the subject of this resolution as early as possible during the 1952 Regular Session of the Legislature.

Resolution read, and adopted on motion of Senator Breed.

Relative to requesting the California Code Commission to study and report on the feasibility of repealing certain unneeded district laws.

Senate Resolution No. 215

Relative to the creation of the Senate Interim Committee on
Highways, Streets, and Bridges.

WHEREAS, The public highways, streets, and bridges of the State are useful, necessary, and indispensable arteries of travel and commerce and have been constructed and improved at great public expense; and

WHEREAS, The State, in providing highway, road, and street facilities, is in effect managing and financing a business enterprise, creating the highway users and employees of the State in excess of \$200,000,000 annually; and

WHEREAS, Highways and other highway improvements are not permanent but must be rebuilt, reconstructed, expanded, and converted both to maintain and improve the existing facilities and to meet changing economic and industrial conditions; and

WHEREAS, The Legislature is responsible to the people as a whole for the imposition of taxes levied to support state highway, county road, and city street programs and in discharging this responsibility cannot be indifferent to the inefficient use of tax resources, but it appears possible that less diligence is presently exercised over expenditures of state-collected highway-user taxes by the State, the counties, and the cities than is exercised over the expenditure of other tax moneys because such expenditures do not directly affect the General Fund of the State or the tax rates of local governments; and

WHEREAS, The Department of Public Works has reported to the Legislature that the cost of improving the state highways alone to standards adequate for 1950 traffic conditions is estimated in excess of three billion dollars, but only \$1.4 billion will be available for construction in the next 10 years; and

WHEREAS, The cost of acquiring rights of way and the limitation of access has risen to alarming proportions and appears to be continuing to rise, and the reasons for the increasing costs should be ascertained and the wisdom of limited access construction under certain conditions, should be reviewed by the Legislature; and

WHEREAS, Serious criticisms have arisen from time to time with respect to the advisability of constructing freeways in metropolitan areas where parking problems are not being solved and mass transit is not being improved; and

WHEREAS, The Legislature in its 1951 Regular Session considered alternative plans of financing an accelerated state highway construction and right-of-way acquisition program but it appeared that further study should be given to all aspects of California's highway problems, including an appraisal of the efficiency and effectiveness with which state-collected highway user tax funds are now being expended by all agencies of government to which such funds are entrusted; and

WHEREAS, The Senate Interim Committee on Highways, Streets, and Bridges, created by Senate Resolution No. 129 in the 1949 Regular Session of the Legislature, during the course of its inquiries found that several counties were apparently failing to comply with the spirit, if not the letter, of the Highway Act of 1947 with respect to county road administration, and, it, therefore, appears that the Legislature should have additional information on this subject in view of the fact that almost \$50,000,000 is apportioned annually by the State to counties for road purposes; and

WHEREAS, The State Comptroller is annually collecting data on county road and city street finance as required by the Highway Act of 1947 and such information should be carefully digested and evaluated for the use of the Legislature in considering legislation dealing with county road and city street affairs; and

WHEREAS, Expenditures by the Department of Motor Vehicles and the Department of the Highway Patrol are directly supported by taxes collected from highway-users and such expenditures directly reduce the amount of funds available for highways and, therefore, should be investigated by the Legislature in view of the apparent need for additional revenue; and

WHEREAS, The Legislature is faced with difficult problems of cost allocation in devising just and reasonable taxes for highway support, which problems have not been fully solved particularly with respect to the equitable taxation of heavy commercial

vehicles although alternative solutions have been considered, and, therefore, further study is necessary in this connection; and

WHEREAS, Additional and more comprehensive data regarding the operating characteristics of various classes of motor vehicles, including such factors as annual vehicle mileages, average fuel consumption, loaded and empty vehicle weights, and the like, are indispensable to the formation of a reasonable and equitable system of highway-user taxation and; therefore, should be collected, analyzed, and made available to the Legislature; and

WHEREAS, No one of the administrative agencies of the State Government is so constituted that it can consider and advise the Legislature on all aspects of highway, road, and street management and finance, and, therefore, the Legislature finds a lack of complete and coordinated information on over-all highway problems; and

WHEREAS, The entire problem of proper maintenance, development, and financing of the highways, streets, and bridges requires continued study, investigation, vigilance, and exercise of foresight on the part of the Legislature to insure that the money of the people of California is wisely expended, that modern and efficient methods are employed, that existing facilities are maintained, and that reasonable measures consistent with efficiency and economy are being taken to maintain, improve, and make safe the arteries of vehicular travel of the State; now, therefore, be it

Resolved by the Senate of the State of California, As follows:

1. The Senate Interim Committee on Highways, Streets, and Bridges is hereby created and authorized and directed to ascertain, study, and analyze all facts relating to and in any way connected with the maintenance and development of safe, efficient, economical, and adequate highways, streets, and bridges and the administration and financing thereof, including but not limited to the operation, effect, administration, enforcement, and needed revision of any and all laws in any way bearing upon or relating to the subject of this resolution and to report thereon to the Senate, including in the reports its recommendations for appropriate legislation.

2. The committee is further specifically authorized and directed to collect by questionnaires, direct investigation, or otherwise, all such information from the owners and operators of motor vehicles on the highways, roads, and streets of this State as it deems necessary in order to formulate a reasonable and equitable system of highway-user taxation for all classes of motor vehicle operation and to carry out the other purposes for which it is created.

- (g) Alternative methods of financing the highway modernization program of California;

(h) Alternative methods of taxing heavy commercial vehicles equitably in relation to taxes on other highway users;

(i) The need for continuing collection of data regarding highway use, vehicle operating characteristics, and the effects of heavy vehicles on highways and vehicle traffic from which can be devised more equitable tax policies;

(j) The advisability of establishing a permanent committee or other agency in order (1) to provide a continuous check on expenditures of state collected highway-user taxes by the State, counties, and cities; (2) to study and recommend legislation to guarantee and insure the most effective highway, road, and street management and the most efficient expenditure of highway, road, and street funds; (3) to accumulate and coordinate data which will provide a rational basis for the allocation of state-collected highway-user taxes among the various levels of government and among geographical areas of the state; (4) to accumulate and coordinate data which will provide a basis for the improvement of the highway-user tax structure and for such modifications of the structure as conditions may justify from time to time; (5) to study, analyze, and appraise on a continuing basis all aspects of highway, road, and street management, expenditure, and finance to the end that the Legislature will at all times be fully advised on the existing facts, new developments, and emerging issues in the transportation field; (6) to make studies of the economics of transportation in general.

including taxation and regulatory policies, to the end that the State's role in providing the road point will be properly balanced with the more development of an efficient transportation system for California.
